SUMMARY

With over years of experience in college building websites and software that helps businesses to improve, I bring to the table a deep understanding and innovation in development, fundamentals, and optimization. My technical expertise includes hands-on experience with backend and front-end development using vanilla CSS3, SCSS, JS, and MS Visual Basic; foundational knowledge in PHP, C++, C, C#, Java, SQL, MSSQL, MYSQL, GIT, and database management; and I have been trained in data analysis, data management, SDLC, SAD, and system deployment for industry. Seeking for a career continuous growth and to contribute to the company success.
